

AIBridge.

The automated AI onboarding and ingestion platform enabling SMBs to evaluate their data readiness and deploy trained support

The Non-Technical AI adoption gap

Engineering Shortage

Small and medium enterprises lack internal software developers to custom-code model vectors or context indexing.

Locked Operational Data

Valuable business specs, FAQs, catalogs, and PDFs lie dormant in text files with zero active use.

Extreme Implementation Costs

Software agencies and consultants charge huge upfront setups, completely pricing out regional SMBs.

93%

of MSMEs are excluded

They want to deploy AI workflows but cannot find accessible, affordable automated integration pathways.

2-Minute automated deployment

01

Ingestion

Crawl live URLs and extract support pages, FAQs, and product definitions automatically.

02

Processing

Chunk and securely catalog messy text files into a clean vector knowledge repository.

03

Readiness Audit

Instantly evaluate business data, suggesting exact opportunity scores and direct benefits.

04

Generation

Generate a secure, context-trained chat widget that embeds onto any website with one click.

Dynamic system capabilities

Auto-Synchronization

Scheduled crawling checks for live website changes, updating vector context autonomously to prevent database drift.

Analytical Audit logs

Track chat interactions, isolate failed responses, and show overall resolution percentages straight to the dashboard.

Frictionless Acquisition

Giving business owners a completely free automated "AI Readiness Score" acts as an immediate sales hook to onboard cold regional leads.

Market Gap

180K+

MSMEs Targeted

Andhra Pradesh government is driving a digital maturity assessment mandate. Local retail, services, and software groups require immediate non-developer tools.

79%+

Vizag Startup Sector Growth

Visakhapatnam is booming with registered digital-first companies shifting away from costly Tier-1 metros. These growing companies demand automated scale solutions.

Predictable tiered subscriptions

Starter Tier

₹2,500 / month

- 🟢 1 Active Chat Widget
- 🟢 Basic Website Crawling (10 Pages)
- 🟢 Automatic Syncing (Weekly)

Growth Tier

₹7,500 / month

- 🟢 Unlimited Multi-Channel Widgets
- 🟢 Complete Site Crawler + Document Parsing
- 🟢 Advanced Analytics & CRM Syncing

Faces Behind the Mission

AI & Product Architecture

Expert in UI/UX systems design, vector schema creation, and contextual LLM retrieval optimization frameworks.

Front End Engineering

Specializes in constructing secure client dashboards, JWT authentication systems, and embeddable widgets.

Data Pipelines & Backend

Architect of scalable background website scrapers, secure document chunks, and backend pipeline APIs.

Marketing and SEO

Built a personal brand on clipping and posting in various social media platform, fluent with video, photo and motion graphic works.

Pre-seed request & milestones

₹1.75L

a-Hub Target Ask

Deploying early non-dilutive grant funds directly to achieve regional product-market validation.

Cloud Servers & LLM API Fees ₹75,000 (43%)

Vizag SME Onboarding Campaigns ₹75,000 (43%)

Company Compliance & Setup ₹25,000 (14%)

Future Scopes

Student Builder Community

Nurturing regional talent corridors by establishing passionate engineering clusters in student bodies across Vizag.

Training & Speaker Sessions

Hosting structured bootcamps, hands-on masterclasses, and industry veteran keynotes on enterprise-scale AI implementation.

AI Cafe & Workzone Hub

Constructing a 24/7 collaborative workspace for builders, inspired by Y Combinator's famous Corgi cafe concept.

VC & Unicorn Pipeline

Connecting regional MVP validations with Tier-1 institutional venture capitalists, super-angels, and unicorn mentors.
